TO OUR CUSTOMERS

PRICES—Quoted are for best commercial grade and quality. TREES SELECTED BY CUSTOMERS AT THE NURSERY WILL BE CHARGED FOR IN ACCORDANCE TO THEIR VALUE. We quote by height but it must be remembered that the height does not always indicate the value of a tree or plant—a very short and compact specimen is more valuable than a slim, straggly one of the same height. Customers can rely upon our selecting full value for the prices charged. We are firm believers in the graded stock system not generally in use in the nursery business. We grade according to height and caliper.

PACKING—The actual cost of packing in boxes or bales will be charged in Invoice. When stock is ordered in carload lots, no charge for packing is made.

DELIVERY—Prices quoted include delivery F. O. B. cars at Nurseries, freight or express charges to be paid by the purchaser.

TERMS—Customers with whom we have had no dealings heretofore should remit with order, or send satisfactory references. Old and known customers can, if they wish, remit on receipt of goods. All accounts are due, NET CASH, as soon as goods are received. Remit by Check, Draft, Express or Money Order.

EARLY ORDERS—Customers should send in their orders as early as possible so we can place them on our digging list. Our work in the digging season is necessarily very much crowded owing to our dependence on the weather conditions, and we can only in exceptional instances fill orders in other than regular turn.

DIGGING SEASON—Usually commences end of September in the fall continuing so long as ground holds open. In the spring from the middle of March until middle of May.

GUARANTEE—We guarantee all our stock true to name and in good condition on leaving our hands, but do not guarantee it to live and grow under all conditions, nor do we make up any loss whatever, due to climate effects, or after culture on the part of the purchaser. In case any mistake should happen in the naming of a plant we will replace it with the true variety as ordered, but we are not liable to more than its original invoice value in refunding money.

OTHER STOCK AND SIZES—If varieties not listed herein or large specimen plants are wanted, write for prices. This list, while very complete, does not give the prices on some of the rarer varieties and large specimen plants.

QUANTITY—One dozen trees or plants of a kind supplied at ten times the single rate. When 100 or more are required of any one sort special rates will be given.

ORNAMENTAL DEPARTMENT

DECIDUOUS TREES

The trees offered in this list have been transplanted several times, are well rooted of symmetrical shape and of quality described. We care for our trees and destroy annually hundreds that do not measure up to our standard of excellence. Most of our deciduous trees are graded by caliper which is incomparably the best standard for the purchaser. A tree 12 to 15 feet in height may not caliper as much as one 10 to 12 or even less and it is thus unproportioned if it is an inferior tree. We have bought some of these offerings at what seemed an astonishingly low price but always to our sorrow.

We can supply a few shade trees 2½ to 4 inches caliper at special prices.

Hundred rates on application.

DECIDUOUS SHRUBS

The shrubs we offer are of standard commercial grade, young and thrifty. They are not crowded in rows to make them grow tall, but are given space enough for proper development. This insures a bushy and full plant which far more than height ought to be and indeed is the standard of excellence. Nearly all our shrubs are dug with a tree digger thus insuring good roots and are exactly what we represent them to be in all particulars.

We have a few large specimen shrubs of many of these kinds. Prices on application.

We will sell 100 shrubs in a good assortment of OUR selecting for \$15.00.
